EMBL Course: Target Engagement in Biology and Drug Discovery

11 - 15 March 2019, EMBL Heidelberg, Germany

Synopsis

- Introduction into state-of-the-art methods for evaluating drug-target engagement with their advantages and limitations
- Practical experience in key techniques CETSA, chemoproteomics, nano-BRET and PROTACS as well as their applications in chemical biology and early drug discovery

Heidelberg, 15 March, 2019
